"What the heart believes, the mind can achieve."

"The I-CAN Design Thinking Course helped me to think differently, creatively and provided me with a structure for problem solving of many community challengers."

## ACHIEVEMENTS
Winning a Younglings Hackathon after a 3 month coding course

## HOBBIES
Coding and Cooking

## INTERESTS
Job Creation
Community Activism
Sanitation For Girls

Clementine Mvukwe, a resident of Kuilsriver, has a deep-rooted passion for empowering young girls with essential skills and knowledge, focusing specifically on self-awareness and personal care. Her commitment to this cause stems from her unwavering belief in the power of youth empowerment, gender equality, and activism.

Having completed matric at Spine Road High School in 2022, Clementine developed a keen interest in both cooking and coding. One of her proudest achievements was winning an internal hackathon, showcasing her remarkable coding abilities after only three months of training. This achievement solidified her passion for technology and entrepreneurship, as it allowed her to express her creativity while simultaneously giving back to the community and creating employment opportunities for youth.

However, Clementine's primary drive lies in addressing the pressing social issue of inadequate sanitation facilities for girls. She is acutely aware that countless girls miss out on valuable education due to the lack of proper sanitation resources in their homes. Through her work, she aims to raise awareness, advocate for change, and provide practical solutions to ensure that girls have access to dignified sanitation, enabling them to attend school consistently and thrive academically.
